

News from us

Week ending 28th June 2019

From Mrs Barber

We are very excited to have our play area remodernised this week. We will be revealing our new equipment next week. Well done to the School Council for helping choose.

Year R 1 News

Well done to all the children who have been practising their high frequency words and have wowed us as they can now read lots of our words by sight. It is great to see how much children are accessing their bug club books. Keep it up! This week we have had a water week. We had an incredible time at Weston Super Mare and could recognise the different homes found at the seaside. After this, we chose to take part in different challenges on the sand. We created a sandcastle town or village, hid and found buried treasure, played bat and balls and even went for a paddle in the sea!

Year 2 News

Year two have been busy learning all about Weston-super-Mare ready for our trip. We found out where it was, looked at how to get there, researched it's history, size and activities to do there. We were very excited to go and it didn't disappoint. Look on the website to see our photos. Since our return we have also written a recount of our day and been busy comparing geographical features of Weston-super-Mare to Upton Snodsbury. Our sunflower growing has been good fun, some have grown down rather than up but we have enjoyed looking after and measuring them. We are looking forward to our last few weeks in year 2, we still have lots to squeeze in!

Year 3 4 News

We have now started our new topic all about bees and have been very buzzy already! We have written our end of year show and have started to make props and learn our lines for our songs and parts. We have also been using figurative language to create some beetastic poetry and describing different scenes. In Science we have been looking at the functions of different parts of the plants.

Science Fun for Parents

We are having a Science Workshop for parents to drop into on Wednesday 3rd July 9.00-10.15 am. Each class will have a carousel of science experiments for you to try with your child. Please come along.

St Kenelm's Flower Festival

Saturday 10.30 am—4.00 pm

Sunday 2.00 pm—4.00 pm

£2.00 entrance fee

Refreshments

The children have produced some amazing flowers to go into the church so please visit.

All welcome.

Thank you

Thank you Mr Hocking and Mr Keetley for helping with our play area.

Recycling

We need different coloured bottle tops:
orange, yellow, gold, blue, grey
Please bring into school.
